

# Survey of de minimis funding

## What is de minimis funding?

Legal state aid granted according to the procedure of the de minimis regulation. The funding is not to be registered, reported or notified to the Commission.

## Limit: EUR 200,000

Public authorities may grant de minimis funding of up to EUR 200,000 (approx. DKK 1.5 million) to an individual company.

## Period and calculation

The limit of EUR 200,000 is calculated over a period of three financial years. Meaning the current year and the two preceding years.

## Sectors and special rules

There are special rules concerning calculation of guarantees and covering some sectors, i.a. the transport sector, export companies and agriculture and fisheries.

## Transparency

It should be possible to pre-calculate the funding amount precisely without making a risk assessment first.

## The limit may not be exceeded.

If the limit is exceeded in connection with the granting of new funding, the entire funding will fall outside the regulation and may be demanded to be repaid with interest.

*\* Regulation no. 1407/2013*

*The above is for guidance and does not constitute a legal opinion*
